

# Concrete Pump Truck Operator

## Job Description

---

### Primary Responsibilities and Duties

- Perform pre-trip and post-trip inspections to ensure that concrete pumps are according to DOT regulations (checking brakes and fluid levels etc.)
- Fill water tanks before each project and ensure that all valves are properly secured and shut
- Drive concrete pump trucks to and from each project site in a punctual and responsible manner
- Evaluate site conditions and work with contractors or supervisors to park / set up the truck properly
- Operate boom and concrete pump to place concrete in desired locations, placing special focus on provided instructions
- Load and unload concrete pump attachments and ensure that all associated tools are used in a safe manner
- Clean concrete pumps at the end of the day to ensure that they remain in good working condition, and to minimize breakdowns and downtimes
- Check that all safety and precautionary measures are put into place before, during and after each project
- All of the duties are not described above, other job related duties will be directed by my supervisor and management.

### Qualifications and Position Requirements

- CDL (Class A / Class B with Air Brakes)
- Favorable work history
- Excellent driving record
- High school diploma or GED
- Ability to read and understand warning labels, instructions, signs and similar information.
- The ability to regularly stand, walk, sit, climb steps, bend, stoop, twist, turn, use hands to feel objects, tools, controls, reach with hands and arms, talk, listen, and good vision.

### Benefits

- Competitive Wage
- Health Insurance
- 401(k) Retirement Plan (after 1 year of employment)
- Paid vacation and holidays

Employment contingent upon physical, drug screen, and criminal background check.
