ECO-ENVIRO STONE™ / CHICAGO BLEND

Not all products and colors are available in every plant.

ECO-ENVIRO STONE™

Pavestone's Eco-Enviro Stone™ is the sustainable solution for permeable pavements. Eco-Enviro Stone™ is produced in a 120mm x 240mm rectangular module that is 80mm thick with an interlocking joint and a micro-chamfered top edge profile. This ingenuity is singular to the Pavestone Eco-Enviro Stone™ product and insures optimum pavement performance unequaled in the permeable paver industry. Eco-Enviro Stone™ can assist in meeting current EPA storm water regulations and LEED certification. The Pavestone Eco-Enviro Stone™ product best achieves the balance of aesthetic segmental paving and the function of permeable pavement.

PLAZA STONE

RECTANGLES & SQUARES

Pavestone's Plaza Stone is a timeless paving stone with an impressionistic embossed surface profile. It creates a gentle and warm effect by combining soft curved edges with rectangular and square stones. Plaza Stone is available in many colors and in standard or Heritage™ Series (tumbled) finish to accommodate the most discriminating tastes and desires. Plaza Stone uses large-scale patterns to create interest and drama for commercial landscaping, while the stone's texture and pattern harmonize with surrounding buildings and site furnishings.

VENETIAN STONE™ HERITAGE™ SERIES

The Venetian Stone™ product advent is the latest development in enhanced pavements by Pavestone. Its uniquely attractive cleft surface sets it apart from ordinary pavers. This texture recalls old world charm and invokes a traditional convention. The larger scale of Venetian Stone™ pavers lends itself to stately residential settings and more expansive commercial applications. Its modular pattern equalizes the scale of any project and is fitting to most any architectural elements.

RUMBLESTONE® COLLECTION

Reminiscent of our fondest childhood toys, Pavestone's innovative RumbleStone® provides a set of rustic building blocks for your outdoor hardscape projects. Whether your project is simple or complex, large or small, RumbleStone's possibilities for creative expression are as limitless as your inner child's imagination. The six tumbled RumbleStone® sizes can be assembled in an endless variety of configurations and orientations. In addition to simple running bond patterns, the stones can be easily stacked with insets, moved forward and backward, horizontally and vertically, for more aesthetically pleasing visual relief and texture. What will you create?

COLOR VARIATIONS

As in all natural materials, color in paving stones and wall stones has inherent variations. Paver and wall color is affected by the variances in the raw materials, concrete mixture, moisture content, climactic conditions, and other variations. Therefore, the colors shown are approximate representations of Pavestone’s paver and wall colors, but should not be expected to be an exact match of what will be delivered.

THE NATURE OF EFFLORESCENCE

Another cause of color variation in paving stones and wall stones may be the natural phenomenon called efflorescence. Efflorescence, a deposit of white salts consisting of mostly calcium carbonate, may appear as a white powder on the paver or wall surface and in no way affects the structural integrity. This phenomenon occurs in all concrete and although it cannot be completely prevented from occurring, efflorescence generally will weather off and disappear over time or can be removed with cleaners at the job site.
